## **AutoNetTV Network 2008 Traffic Count and Intercept Survey May 1 - 30, 2008**

AutoNetTV is an out-of-home television network located in 2,505 sites throughout the U.S. as of March 2008. Measurement was conducted in tire centers (264), quick lubes (184), and full-service auto centers (2,057).

Nielsen Media Research's Strategic Media Research fielded intercept interviews and enumeration counts for a statistical probability sample of affiliated AutoNetTV Network sites, dates and dayparts. During a 30-day measurement interval of May 1 - 30, 2008, traffic counting and interviewing took place in 38 total locations (14 quick lube locations, 13 tire centers, and 11 full-service auto centers) across 38 dayparts. Intercept interviews were completed with 309 patrons 18 years of age or older as they exited the sites. Sample sites were selected from the 2,505 total affiliated locations across the United States.

The field services utilized for the study were instructed to verify that the AutoNetTV screens were on before starting the interviewing. The results from a separate media compliance audit should be used to evaluate the impact of compliance on media delivery and viewing levels in this report.
